

# National Peace Study Project To Bring To People Of Canada Vital Facts Regarding Peace

A national peace study project to bring to every man and woman in Canada the importance of peace, was announced by J. R. MacPherson, president of the Association of Canadian clubs, and Hon. Ernest Lapointe, president of the League of Nations society.

In "A letter to all Canadians," the details of the society's project were announced. For the first time in Canadian history, it was stated, an attempt was to be made through the combined use of the radio, the press and group discussion of have a simultaneous study of a subject throughout the nation.

What is described as Sir Arthur Currie's great message was used by Mr. MacPherson and Mr. Lapointe to emphasize the importance of their plan, and his question whether Canadians were bestirring themselves "In this night of hysteria which may end in war" was reiterated.

Eleven Sunday afternoon addresses have been arranged to introduce the various topics listed in the discussion and study outline. The addresses, which will be broadcast, follow:

Jan. 21—Rt. Hon. Sir Robert Borden and Hon. Mr. Lapointe on Canadian responsibilities.

Jan. 28—Col. George A. Drew, president of the Toronto branch of the League of Nations Society in Canada, on "Why Should Canadians Be Interested in World Peace?"

Feb. 4—Dr. R. H. MacPherson, president of the University of Alberta, on "How Is Peace To Be Maintained—By Force or Co-operation?"

Feb. 11—Dr. H. F. Munro, superintendent of education for Nova Scotia and former delegate to the Assembly of the League of Nations, on "What Does Partnership in the Collective System Involve for Canada?"

Feb. 18—Hon. Yvonne Pallant, member of the Alberta government and former delegate to the assembly of the League of Nations, on "What Happen to Canada If The Collective System Were Abandoned?"

Feb. 25—Mrs. H. P. Plumptre, member of the Toronto board of education and former delegate to the assembly of the League of Nations, on "Present Obstacles to Peace."

March 4—John W. P. Macdonald, chief-clerk of the Winnipeg Free Press, on "Why Did the Collective System Fail in Manchuria?"

March 11—Hon. R. J. Manion, minister of railways and canals and delegate to the last assembly of the League of Nations, on "Disarmament."

March 18—J. M. Macdonnell, president-elect of the Toronto board of trade, on "How Can We Work For Peace in Canada?"

March 25—Prof. T. W. L. MacDermot, national secretary of the League of Nations society in Canada, on "How Can Canada Work For Peace in the World?"

April 1—Hon. Mr. Lapointe and Brooke Claxton, Montreal, vice-president of the League of Nations society in Canada, in a summary and review.

## Should Study Politics

All Those Who Have Interests Of Country At Heart Should Give Subject Attention

Politics, linked up as it is with the rising and progress of people should not be considered degrading nor beneath the notice of respectable persons. Hon. Ernest Lapointe, former minister of justice, told the Women's Canadian club at Quebec.

Stressing that people should not study politics due to a dislike for it or that politician, Mr. Lapointe argued that after all the basic material of politics was human nature and all its qualities and imperfections.

All those who had the interests of their own country at heart, he emphasized, should study politics.

## Got Their Man

The Royal Canadian Mounted Police took six years but they finally located Israel Blatnikoff in Philadelphia and took him to Montreal to face a charge of narcotic drug possession. He pleaded guilty. In 1927, Blatnikoff jumped bail in an amount of \$11,000 which was forfeited to the crown.

Exports from Buenos Aires Ship ports continue to decline.

## Five Servants Of Men

Sense Of Taste And Smell Are Closely Linked

When one has a cold nothing seems to taste right. The wife may have done her best with the apple pie, the mashed potatoes may be as good and smooth as your desire, but it's a task to do it.

There is a simple reason for it. A cold obstructs what scientists call the olfactory epithelium, located in a little niche in the skull just above and behind the nostrils. It's your sniffer.

The senses of taste and smell are so closely linked it is almost impossible to say, sometimes, which is which. Sugar and salt are exceptions. We cannot detect them by smelling as a rule.

Take your nose out for a walk some day. As you pass the grocery, the meat market, the hotel, the bakery and the book store, not how your memory and your sight are helped out by the sense of smell. Each place of business has its distinctive odour. Every human has five wonderful senses. They are sight, hearing, touch, taste and smell. Learn to use them all with intelligence.

## Valuable Gift For Library

British Columbia Has Facsimile Of Page From Codex Sinaiticus

A facsimile of a page from the Codex Sinaiticus bearing the signature of Constantine Tischendorf has been presented to the library of British Columbia.

The presentation was made by J. M. Rowley, whose father, Rev. Alexander Stewart, received it as a gift of friendship from Tischendorf in 1913. This was three years before the death of the scholar who was largely responsible for the preservation of the great Biblical document recently purchased by the British Museum from the government of Soviet Russia.

The value of the local document is not known, but in a history of Tischendorf written by Mr. Stewart it is described as "the only copy left in existence outside of Russia." It is on parchment and framed in glass.

## Forced Feeding For Snake

African Python In St. Louis Zoo Refuses To Eat

For six years, attendants at the St. Louis zoo have kept a miniature African python alive by force-feeding it through a section of its nose.

Stubbornly refusing to eat, even when tempted with every sort of reptilian delicacy, the python proved a problem which in 1918 was finally solved.

Every six weeks, the snake is held by seven men and the nose stuffed with a tube. The python is then forced down its throat. A plunger then pushes the food into the snake. The attendants have the job of "massaging" the food into the python's stomach, as it refuses to swallow. The reptile has thrived on this forced diet, gaining in both length and girth during its six years at the zoo.

## Find Stone Goddies

May Be Connecting Link Between Chinese And Indian Race

A "stone goddies" unearthed on the farm of Mrs. J. Miller near North Battleford, is attracting considerable attention and if found to be authentic, after examination by experts, will be removed to Regina museum as a carving left behind by Mongols, who are believed to have crossed into America by way of Bering Straits.

Hon. J. F. Bryant, Saskatchewan minister of public works, was the stone and was singularly impressed. "From the general appearance of the carving it bears a close resemblance to Chinese art," he stated, "and may be another connecting link tracing the Indian race to the Chinese, who are supposed to have come over Bering Straits to America at some time in the prehistoric age."

A Hollywood film actress is keenly interested in a farm she is cultivating. Most of the stars make a hobby of husbandry.

Ninety-two parties had candidates in the last election in Spain.

## For Benefit Of Ireland

Money Left To De Valera Will Constitute Trust Fund

Samon de Valera, president of the Irish Free State, was the winning party in an action concerning the will of Miss Polly Fitzpatrick, a Brighton woman, 72 years old, who was found dead at her home in July, 1927.

Miss Fitzpatrick left a will part of which read: "I give and bequeath to Mr. de Valera my house and all my furniture and effects." The value of the estate is a little more than \$15,000.

The will was contested by John Fitzpatrick, of Dublin, who claimed his sister was of weak intellect, childish and eccentric, that in late years she had become a recluse, and that she died in a neglected condition, having refused to have medical treatment. When Miss Fitzpatrick died, said counsel for De Valera, she had no relatives with whom she had been in touch for 40 years. She had said that her property would go to Ireland when she died. She also expressed the view that the only man who had done any good for Ireland was Mr. De Valera.

"It is not Mr. de Valera's intention to profit by a penny piece from this estate. His intention is that the money shall be used by him as a trust for public purposes of the kind which Miss Fitzpatrick was known to approve," said counsel.

## Had Fairly Good Luck

One Crop Failure In Eighteen Years Record Of Homesteader

W. L. Clark in Border Cities Star says: "The ramifications of the poor crop in Western Canada extend to unexpected quarters. For instance, we met a man in Los Angeles who homesteaded a farm near Saskatoon many years ago. He worked the land, improved it and finally got title to the property."

Eighteen years ago he rented the farm on a crop sharing basis. Shortly after that he moved out to California for his health. When he left the prairie he understood to rent his farm on the share undisturbed. And every year, during the fourteen years he has been in Los Angeles, he has got some return until this year.

He is missing the crop money this winter. Last summer grasshoppers, drought and other things visited his land. The crop was a complete failure. Only one crop before has such a thing happened. That year he was killed out, but he had insurance and collected."

## Noted Architect Dead

Sir Frank Baines Designed Buildings In England And Everywhere

Sir Frank Baines, architect, is dead in England. Last year he went to Turkey and advised Mustafa Kemal on the rebuilding of Istanbul. He was sixty-six years old. Baines was for several years responsible for the preservation of the royal palaces and other important buildings in England. He designed buildings of almost every type. In 1922 he was appointed architect for the rebuilding of Olympia, London's big exhibition hall, on a huge scale at a cost of \$2,000,000.

Nearly 1,700,000 foreign tourists visited Italy in the first eight months of 1928.

## HAMILTON GIVES BANQUET FOR CHILDREN IN LONDON

For several years a banquet has been held in the Guildhall, London, England, at which the City of Hamilton, Ontario, has been host to some 1,200 children of the British Empire. Our picture, taken at the forty-first banquet, shows the Lord Mayor of London (second right), among the children, while the girl pupils of Dagenham prepare to lead the procession into the banquet hall.

# Proposal Is Put Forward For An Arctic National Park For Game Protection Purposes

## Stamp Collection Is Missing

Detectives Probe Disappearance Of Stamps At St. John's, Newfoundland

Swinging from an extensive investigation into widespread stamp forgery, government detectives are delving into the mysterious disappearance of stamps valued at more than \$50,000 from the St. John's post office and the Newfoundland museum building.

The operatives were tight-lipped as they traced down slender clues, but from the department of justice came an intimation the search might turn toward postal officials.

Difficulty had been met, an official statement said, in getting information from postal employees because of a fear of becoming conspicuous in any investigation, especially if it implicates his superiors. The government has been collecting for almost a half century.

Part of the vast collection, consisting of stamps from almost all the world, were stored in the museum building, closed since 1920. These were affixed in albums, as were part of those stored in the post office. Others, received since 1928, were in bundles in the post office.

## Weather Of Long Ago

Our Winters Are Balmy When Grandfather Tells His Story

Wherever men discuss the weather, and oftend we don't know of any place where it is not a popular subject of conversation, there seems to be a belief that our winters are not as severe as they used to be.

A bit of research work leads only to the conclusion that they never have been. Fathers of today start their offspring with tales of how cold it used to be when they were little. Grandpa starts when he hears dad talking about the weather of 25 or 30 years ago, and remarks that the winters then as he recalls them, were positively balmy compared with the brand served up when he was a lad.

It's the great-grandfathers, however who can spin the most robust yarns. They leave their audience with the impression that away back, the winters then as he recalls them, were positively balmy compared with the brand served up when he was a lad.

It was farther east than the Thelon river, and beyond the present game preserve. He noted that there was a stretch of country 80 miles in length, where no human entered.

This natural sanctuary was farther west than the coastal Eskimo village. It was farther east than the Thelon river, and beyond the present game preserve. He noted that there was a stretch of country 80 miles in length, where no human entered.

As early as 1899, David W. Hartley, efficient northern traveller, set out from Winnipeg to explore the Thelon river, and made the present game preserve. He noted that there was a stretch of country 80 miles in length, where no human entered.

An announcement comes from Winnipeg that the provincial government will be asked to support an arctic national park for game protection purposes. The park would be a strip of land astride the Churchill river near the airport. He claims that the preservation of the musk-ox is of primary necessity, but urgent. He says that they have been transplanted to Alaska and several of them have been lost. He is in the Manitoba portion of the range.

Apart from the educational and conservation considerations in the proposed park, there is another thought. It is, that interest in the musk-ox in the United States is moving westward.

A number of indirectly related forces have been working over a period of years, and nature joined from different points, to arrive for a national park at Churchill.

These widely separated contributing factors have converged, promoters in the proposed park, there is another thought. It is, that interest in the musk-ox in the United States is moving westward.

### AUDITOR'S SPECIAL REPORT

Owing to illness of the Secretary-Treasurer this audit has been delayed beyond the usual time.

### AUDITORS CERTIFICATE

I have audited the accounts of the Village of Carbon for the year ending December 31, 1933, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the Village, according to the best of my information, the explanations given to me and as shown by the records, subject to any qualifications mentioned in Auditor's Special Report herewith.

The statistical information contained herein was obtained from the books and records of the Village, or from information supplied by officials of the Village.

Dated at Carbon this 27th day of January, 1934.  
(Signed) JOHN ATKINSON, auditor,  
Box 74, Carbon, Alberta
